

Sargent & Greenleaf® Titan Series Locks

State-of-the-Art Protection for your Weapons and Valuables

Why an S&G® Titan Lock on your Gun Safe?

- A new concept in locking mechanisms based on the proven security of a rugged, motorized blocking device.
- You get to choose the model that works best for you—
PivotBolt™ Titan for automatic locking whenever the safe's handle is turned to the locked position
or...
D•Drive™ Titan that locks and unlocks by rotating the keypad.
- Both Titan models offer a full range of features, letting you choose anything from simple, one-code operation to multiple codes, dual control, time delay, even holdup duress. You choose the level of sophistication that works for you.
- Fast entry with just a 6-digit code.
- Change your opening code with a few simple keypad strokes at any time.
- External battery placement puts the battery inside the keypad, where it can be easily changed. And efficient lock design means the battery must be changed significantly less often.
- Live technical support by phone, and 24/7 web-based support, including complete product instructions.

The Titan Advantage:

- Recognized worldwide by independent security agencies that test locks to the most rigorous standards.

Sargent & Greenleaf® Mechanical Safe Lock

The Traditional Time Tested Choice for your Safe

Why S&G® Mechanical on your Gun Safe?

- There is no manufacturer in the world that can begin to compare to Sargent & Greenleaf's historical role as an innovative American designer and maker of rugged, dependable mechanical locking mechanisms for safes. Ask any safe technician his preferred brand of mechanical safe lock, and the answer is bound to be "S&G."

The S&G Advantage:

- Over 150 years of continuous innovation in safe lock design and manufacturing, serving safe manufacturers and service technicians worldwide.
- All-metal construction, including machined brass components for smooth operation and long life.
- A wide range of dial and ring styles and finishes; black & white, chrome, brass, 14-karat and 24-karat gold plate.

- Underwriters Laboratories Listed under Standard 768.

- Internal relock trigger mechanism to defeat dial punching attacks.
- Completely mechanical operation requires no batteries or external power source.
- Unaffected by EMP (electromagnetic pulse) or radiation.

Sargent & Greenleaf, an American company, has been making rugged, dependable safe locks since 1857, and has built a worldwide reputation for delivering security created by American ingenuity.
