

2890B SCIF Lock

Secure Entry. Safe Exit.

Built to Federal Specification FF-L-2890B

SARGENT AND GREENLEAF®

Introducing the S&G® 2890B

Sargent and Greenleaf® created an integrated door lock designed to meet both the security and life safety demands of highly sensitive SCIF environments.

Uncompromised security.
Improved safety.

As the first 3-Hour UL Fire Listed solution for single or double SCIF doors, the 2890B provides the perfect combination of security and life safety at military bases, defense contractor sites, embassies and fusion centers. The S&G 2890B is available in all six SCIF lock types and works in conjunction with both of the government-approved combination locks currently protecting national security information in GSA containers worldwide.

Designed for single motion egress, the S&G 2890B provides intuitive and safe egress from inside secure rooms. It is also compatible with many UL-rated S&G mechanical and electronic safe locks, creating an integrated security and life safety solution to meet the needs of non-government environments like cash processing facilities, server rooms, museums and other commercial spaces that protect valuable assets.

Types I through IV shown

Unique features.
Unsurpassed warranty.

As the first panic bar and lever-integrated SCIF locks with a 5-year manufacturer warranty, the S&G 2890B offers:

FLEXIBLE DESIGN

- Non-handed to accommodate a variety of applications
- Multiple strike options available

FULL RANGE OF FUNCTIONALITY

- When coupled with the S&G 2740B or Kaba's X-10 electromechanical combination locks, the 2890B offers a secondary locking option based on your needs:
 - **Types I and III** lock and unlock with mechanical keys
 - **Types II and IV** function within your access control system and offer mechanical key backup
 - **Types V and VI** function as passage levers

PERFORMANCE CERTIFICATIONS

- NFPA 101 Life Safety
- UL Fire 10B and 10C
- UL 305
- Handle 1M cycles
- BHMA
- Panic Bar 500K cycles

2890B SCIF Lock

All types offer combination lock blocking from inside the SCIF via keyed cam lock or keyless thumbturn (Type VI only).

2890B Interior
Types I, II, V and VI

2890B Interior
Types III and IV

One design.
Six lock types.

As an innovative modular system using patent-pending technology, the S&G 2890B can be ordered in any of the functions outlined in Federal Spec FF-L-2890B. The result is one proven design available in six different lock types.

Pedestrian Door Preassembled Locks (PDPL) Types I and II

FF-L-2890B CLASSIFICATION

*Center Locking Module
with **Lever** and Integrated
Secondary Locking Options*

- Ideal for low occupancy secure rooms (i.e., offices)
- Combines a GSA-approved electromechanical combination lock on the outside of the door with a simple, sturdy ADA-compliant release handle on the exit side
- Prepped Mechanical Key Rim Cylinder
- Allows Electronic Access Control integration (Type II only)

Pedestrian Door Lock Assembly Panic (PDLAP) Types III and IV

FF-L-2890B CLASSIFICATION

*Center Locking Module
with **Panic Bar** and Integrated
Secondary Locking Options*

- Ideal for secure assembly rooms (i.e., meetings and conference rooms)
- Provides fast, intuitive egress with a single-push panic bar
- Combines a GSA-approved electromechanical combination lock on the outside of the door with a proven, sturdy, ADA-compliant exit device mechanism
- Prepped Mechanical Key Rim Cylinder
- Allows Electronic Access Control integration (Type IV only)

Auxiliary Deadbolts (ADB) Types V and VI

FF-L-2890B CLASSIFICATION

*Center Locking Module
with **Lever***

- Recommended for non occupancy secure rooms (i.e., storage closets)
- Single-motion egress lever life safety device
- Compatible with GSA-approved combination lock (Style 2 or 1)
- Type VI available with thumbturn for blocking the retracted dial lock's bolt

Secure sensitive assets. Ensure safe egress.

The S&G 2890B contains everything you need for a SCIF environment, giving you the most secure life safety SCIF lock available. Built to exceed federal specifications, it allows for safe egress, while ensuring the security of your most valuable assets. S&G stands behind this innovative product with an industry-leading 5-year product warranty (when used with S&G 2740B lock).

ORDER THE S&G 2890B FOR YOUR SCIF DOOR TODAY.

(For new construction or retrofit applications)

- **Method 1:** S&G 2890B + S&G 2740B on the same order to maximize savings and warranty
- **Method 2:** S&G 2890B (and source combination lock separately)
- **Method 3:** ICD 705 pre-installed door package including all mounted hardware (S&G 2890B + combination dial lock, frame, hinges, closer, cylinder)

A REPUTATION SECURED LONG AGO.

Sargent and Greenleaf has a long history of developing high-security mechanical and electromechanical locks to protect government assets, people and information. Our expertise dates back to the U.S. Treasury's adoption of James Sargent's Magnetic Bank Lock circa 1860. More than 150 years later, we're still innovating quality locks to secure the most sensitive assets.

Sargent and Greenleaf is part of the Stanley Black & Decker family of leading brands.
