## **Sargent and Greenleaf Introduces the S&G 2890B SCIF Lock, First in Industry Available in all 6 Types designated in U.S. Federal Specification FF-L-2890B**

**Nicholasville, KY – (July 24, 2015)** – Sargent and Greenleaf, Inc. (S&G), a division of STANLEY Security, is now in full production of the S&G® 2890B SCIF Lock – the first of its kind in the security industry designed to meet U.S. federal specification FF-L-2890B. This weekend, July 24-25, S&G is offering demos at the ALOA Security Professionals Association, Reno, NV.

The S&G 2890B SCIF-Lock represents the latest design advances to produce a single motion egress door lock for the highest level of security, and is the first and only hardware currently designed to FF-L-2890B federal specifications to include a UL 3-Hour Fire rating and the required ANSI/BHMA ratings. The S&G 2890B is intended to meet both the stringent needs of NFPA 101 life safety and high-security requirements for government applications. The lock is designed for Sensitive Compartmented Information Facility (SCIF) applications for U.S. military, fusion centers, defense contractors and others.

“The introduction of the S&G 2890B is one of those rare firsts in the industry,” said Nate Brown, Marketing Manager for Sargent and Greenleaf. “This is a revolutionary solution that offers full integration capabilities for a number of high-security government facilities and applications. The

2890B proves S&G's 150-year reputation for innovative, powerful and protective solutions built for the most rigorous federal standards."

The lock is available to ship now in a variety of styles, including:

- **Type I and Type II:** Designed to combine the unparalleled security of an S&G Model 2740B electromechanical combination lock on the outside of a door with a simple, sturdy, ADA-compliant release handle on the inside
- **Type III and Type IV:** Provide single motion egress while meeting the highest government security standards. A single push of a built-in panic bar releases the entire locking mechanism to allow for fast, intuitive egress, and is ideal for fire doors.
- **Type V and Type VI:** Incorporate some of the same, heavy-duty components found in the more sophisticated Types I, II, III and IV units to construct a high-security, auto-escape door locking mechanism with exit lever.

Comprehensive features of the newly released S&G 2890B include:

- Ability to integrate both combination locks approved to federal specification FF-L-2740B: the S&G Model 2740B electromechanical combination lock, as well as the X-10.
- Types II and IV allow integration with the facility's electronic access control system. Types I through IV are mechanical key rim cylinder prepped.
- Through-mounting with heavy-duty, adjustable standoffs for a strong, solid mount that cannot cause door collapse
- Fully configurable for left-hand and right-hand metal, wood or composite doors
- Heavy-duty, surface-mounted strikes with integral roller for secure, smooth operation
- Pinch-proof strikes available for in-swing, out-swing and double door applications, all featuring the UL 3-Hour Fire rating.

For more information, please visit Sargent and Greenleaf at the STANLEY Security booth #227 this weekend at ALOA to see the integrated 2890B solutions for SCIFs, or learn more at [www.sargentandgreenleaf.com/2890B](http://www.sargentandgreenleaf.com/2890B) and [www.STANLEYSecurity.com](http://www.STANLEYSecurity.com).

## **About Sargent and Greenleaf, Inc.:**

Sargent and Greenleaf, a subsidiary of STANLEY Security, is one of the world's leading manufacturers of medium- and high-security locks and locking systems. Since 1857, Sargent and Greenleaf has provided security solutions to financial institutions, commercial businesses, governments and consumers around the world. Delivered through an international network of distribution partners, Sargent and Greenleaf products continue to set the standard for quality, value and technical innovation. For more information, visit the company online at [www.sargentandgreenleaf.com](http://www.sargentandgreenleaf.com), or call (800) 826-7652.

## **About STANLEY Security**

STANLEY Security, a division of Stanley Black & Decker, is a provider of integrated security solutions defining the future of the security industry. STANLEY delivers a comprehensive suite of security products, software and integrated systems with a strong emphasis on service. STANLEY is powered by a culture of continuous innovation, providing revolutionary technology and unmatched customer service to commercial, institutional and industrial businesses and organizations. We focus on complete customer transparency and operational excellence in the five customer touchpoints: account management, installation, service, monitoring and billing. STANLEY takes pride in our signature approach to doing business – offering global resources, with a local touch. As one of the world's largest and most comprehensive security providers, we're protecting what's important to you by designing an extensive array of products and solutions that span the entire security spectrum:

- Intrusion, Fire, Access Control and Video Surveillance Systems
- Systems Integration & Vertical Market Solutions
- Automatic Entrance Solutions
- Door Locking Hardware, Closers & Exit Devices
- Master Keyed Systems
- Safe Lock & Vault Solutions
- RTLS Asset Visibility Solutions
- Iris Biometric Identity Authentication Solutions
- UL & Bilingual ULC Monitoring Services
- Real-Time, Online eServices
