NEW A-Series One-Time Code App

Combining high level security with the convenience of the One-Time Code Mobile App

When servicing ATMs, technicians must call a dispatcher to obtain a One-Time Code (OTC) to access the ATM. The NEW S&G A-Series One-Time Code App allows technicians to generate one-time codes from their mobile phones without the assistance of a dispatcher.

NEW! **A-Series** **One-Time Code App**

Generate One-Time Codes from your mobile device without the assistance of a dispatcher!
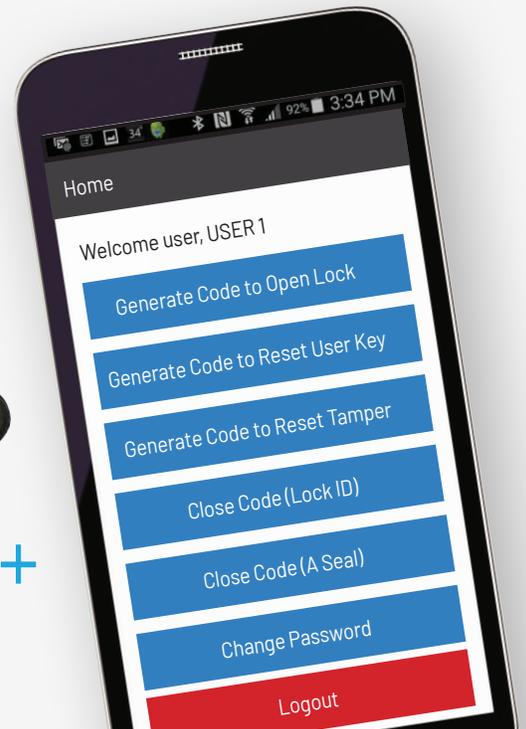

Features & Benefits

- One-time codes automatically generated without assistance from call center

- Backward compatible for all existing A-Series products

- Combinations expire if not used

- Penalty lockout after too many incorrect login attempts

- 24/7 call center support

- Supervisors control when technicians access the network via the mobile app by selecting available time windows

- All combinations generated using mobile application are recorded in LMS

- Compatible with Android devices, but a web application is included with the ACG Software that is compatible with all mobile devices

How to generate a One-Time Code using the mobile app

1.

Technicians securely log into the A-Series OTC Mobile App

2.

Technicians select the option to generate code

3.

Technicians enter lock ID value (or scan the bar code) & PIN

4.

Operation code is generated
