

## Sargent & Greenleaf Introduces Revolutionary New I-Series Keypad for Safe Security

*The first and only safe lock on the market with in-the-field instant upgrades for total control and flexibility*

**NICHOLASVILLE, KY. – (Dec. 14, 2020)** Sargent and Greenleaf (S&G), a global manufacturing leader of high security locks and locking systems, announces the official launch of their innovative new I-Series Keypad, the industry's first and only keypad offering secure, instant upgrades. With this future-proof design, the new I-Series Keypad replaces standard safe lock keypads with ease of installation and enhanced features for total control and flexibility.

“For too long, security has followed a predictable path,” commented Mark LeMire, S&G CEO. “It’s time to strike out in a new direction with products designed to answer end-user needs now and well into the future.”

“The new I-Series Keypad reflects an industry-wide growing demand for biometric and network-enabled solutions and gives the end user instant access to the latest and greatest all-inclusive security solutions,” said Devon Ratliff, S&G director of engineering. “As needs evolve, this keypad evolves right with them, placing full control of their safe security directly into the hands of the end user.”

### **Features/Benefits of the New S&G I-Series Keypad**

**Future-proof design.** Designed to fit today’s intuitive user experience and support ongoing enhancements, the I-Series Keypad fits standard safe lock keypad footprints with a modern, streamlined aesthetic. An updated, brushed black aluminum casing houses a biometric finger scan and user-friendly LCD touchscreen, with proven impact-resistance and durability. The screen exceeds UL impact protocol, resulting in a keypad that is built to last.

**Instant upgrades.** Through the S&G secure mobile app with advanced encryption, consumers, banks, and businesses possess the real-time, leading-edge security of instant upgrades. Features and functionality are customizable and immediate. No more waiting on equipment or costly physical upgrades.

**Empowering modern markets.** The I-Series Keypad supports three methods of entry: touchscreen keypad, biometric finger scan, or touch-free mobile app. Flexibility renders the I-Series ideal for a wide range of applications: financial

institutions searching for high-security options will appreciate the advanced audit and encryption features and instant access to the latest security upgrades; businesses benefit from the low-touch entry and high-durability construction, along with the significant time and resource savings delivered via instant field upgrades; and for consumers seeking to upgrade to a more modern look, the I-Series Keypad offers an understated aesthetic and sleek functionality to fit today's smart homes.

**Security Reimagined.** With a renewed commitment to quality and innovation, the S&G new forward-thinking solutions are designed to meet customer needs now and also keep products relevant for the future. Every solution is carefully designed and rigorously tested against international standards to deliver even greater value over time. "That's our promise," LeMire added. "We keep an eye on what's ahead, so our customers stay secure."
