

# C-SERIES

powered by **sgcloud**<sup>™</sup>

REVOLUTIONIZING SECURITY:

## NO KEYPADS. NO CODES.

### Introducing the Next Generation of Smart Locks: C-Series From Sargent & Greenleaf.

An innovative solution that simplifies lock management, providing intuitive controls and unmatched security through the power of SGCloud<sup>™</sup>. Say goodbye to PINs, physical keypads, and on-site programming. The C-Series locks are the first cloud-powered Sargent & Greenleaf solution to eliminate the keypad entirely—replacing it with secure, mobile-based access you can control from anywhere. Whether you're responsible for one lock or hundreds, C-Series locks eliminate keypad vulnerabilities for ATMs, cash-in-transit operations, and banking environments—giving you the power to simplify and scale your operations with ease.

## WHY CHOOSE THE C-SERIES?

### NO KEYPAD. NO KEYS. NO HASSLE.

Encrypted mobile tokens eliminate keys, PINs, and keypad tampering.

### YOUR MOBILE DEVICE BECOMES YOUR KEY

Users unlock, audit, and manage access on site or remotely.

### REMOTE CLOUD CONTROL

Grant access, update permissions, or review activity logs anytime via SGCloud.

### PLUG-AND-PLAY INSTALLATION

Works with retrofits and new installs.

### OFFLINE-READY

Maintains function even during network disruptions.

Available Functions: Pivot, Direct Drive, Auto-Relocking

## sgcloud<sup>™</sup>

### WHAT IS SGCLOUD?

SGCloud is Sargent and Greenleaf's high-security cloud platform that connects and manages your C-Series locks, giving you real-time access, control, and data oversight from anywhere.

## GET STARTED TODAY

For more information or to schedule a demonstration, visit [SargentandGreenleaf.com](http://SargentandGreenleaf.com). Experience the innovative security and management capabilities of Sargent & Greenleaf's C-Series locks.

# DESIGNED FOR CRITICAL ENVIRONMENTS

Whether it's ATMs, cash-in-transit operations, or retail safes, the C-Series is up to the challenge. With Sargent & Greenleaf's long-standing reputation for high-security solutions, this next-generation lock combines the best of our mechanical and electronic expertise with cutting-edge cloud capabilities.

## THE C-SERIES ADVANTAGE

### KEYPAD-FREE ACCESS

Mobile tokens eliminate vulnerabilities tied to physical keypads or PIN sharing.

### MOBILE CONTROL

Grant or revoke permissions, and access audit trails instantly.

### CLOUD-BASED OVERSIGHT

Real-time lock data, user logs, and battery health via SGCloud.

### INTEGRATION & SCALABILITY

Retrofit-ready, scales from one ATM to a broad global network.

### ADVANCED SECURITY

Dual authentication, duress options, and encrypted tokens.

Available Functions: Pivot, Direct Drive, Auto-Retlocking

## INNOVATIVE FEATURES BUILT FOR YOUR NEEDS

### TAILORED EVERY STEP OF THE WAY

- Versatility meets precision with the C-Series, which is ideal for applications ranging from cash-dispensing ATMs and CIT operations to retail safes and interactive teller machines (ITMs). The lock system integrates effortlessly into new and retrofit setups—reducing downtime and installation costs.

### ENHANCED SECURITY FOR CRITICAL ASSETS

- Replace physical keys and keypads with secure, one-time encrypted tokens. This eliminates traditional access challenges while providing real-time monitoring and detailed audit trails for system transparency.

### OPERATIONAL CONTINUITY GUARANTEED

- Offline access ensures functionality even during network disruptions, safeguarding your operations when they are most vulnerable.

### SCALABILITY FOR ALL BUSINESS SIZES

- From a single safe to a global ATM network, the C-Series is flexible with your operations, delivering efficiency and operational confidence to banking, retail, and CIT organizations.

## SGCLOUD INTELLIGENT SECURITY IN THE CLOUD

The SGCloud platform powers the C-Series with secure, wireless, cloud-based management—linking each Bluetooth-enabled lock to a centralized console connected to the internet or Wi-Fi for configuration, updates, and real-time visibility. Designed for high-security environments, SGCloud ensures every action is encrypted, logged, and accessible to authorized users anywhere in the world.
